### **Academic Objective**

I am an ambitious and dedicated Computer Science student with a proven track record in management, business, and leadership. I have a strong foundation in programming, data science, and AI. My academic and independent research interests focus on quantum computing, data aggregation, and cybersecurity, with particular attention to the practical applications of quantum technologies. I am passionate about learning emerging technologies to address new and arising complex challenges in the world of computing and data security. I seek to gain hands-on experience in applied quantum computing and software development, so I can contribute to pioneering advancements while staying at the forefront of innovation and security.
